Construction & more

Intelligent packaging solutions by Hugo Beck

servo X

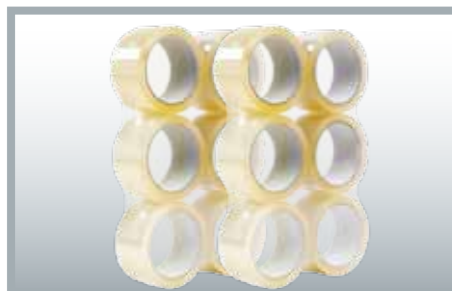

## Both far-reaching and wide-ranging

Whether it's an entry-level machine or a high-end device, whether it's a series machine or an individually tailored solution: Hugo Beck is one of the leading global manufacturers of film packaging machines. Flowpack, bagged or shrink-wrapped packaging; flexibly deployable feeders and peripheral devices – we offer unbeatably comprehensive services in the horizontal packaging segment. The far-reaching and at the same time wide-ranging know-how of Hugo Beck is also reflected in our three business segments: Household, Construction & more, Pharmaceuticals, Food and Cosmetics, and finally Print and Paper.

## Safe and consumer-friendly

Household, construction & more – the requirements that we, Hugo Beck, master in these business segments are manifold. Vacuum cleaners, non-wovens, shirts, DVDs, wooden panels etc. Be it hard or soft materials, cumbersome or manageable formats, exclusive or cost-efficient products: Hugo Beck machines package a wide variety of products in a consumer-friendly, safe and sophisticated manner. As a standalone product or in a bundle.

We offer both stand-alone devices – ideal for small budgets, small quantities and frequently changing orders – and high-end machines with a high degree of automation and first-class connection to downstream and upstream systems.

## Naturally outstanding

Thanks to our user-friendly packaging machines and feeders, we cover an extraordinarily large product spectrum in the business segment of household, construction & more. Our high-performance and extremely flexible film packaging machines thus optimally shrink-wrap long wooden parts such as parquet, laminate or skirting. The clear film packaging hereby not only fulfils an important protective function; it also emphasises the value and the character of the products. Thanks to special measures that are taken to ensure tight packaging, barely any waste is produced during processing.

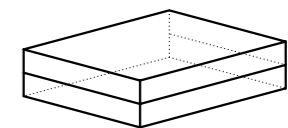

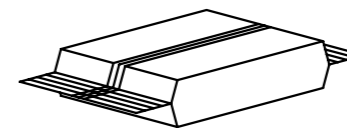

## Packaging with drive

Side sealing machine, flowpack facilities or banderoling machines: Our packaging machines and periphery modules for film wrapping are ideally suited for products from the automobile industry, hydraulic and pneumatic products for example. Or for vehicle accessories such as wiper blades and cable coils.

Because the efficient film packaging facilities of Hugo Beck are adaptable to a variety of products, they also effectively shrink-wrap and film-pack textiles, multimedia and DIY products.

Flowpack packaging

Side sealing

**flowpack X**

With or without air tight packaging with film feeding from above or below; Length from 30mm; Width 10 – 330mm; Height up to 120mm  
Output up to 18,000 cycles / hour

**Modern multitaskers**

The long-lasting and low-maintenance packaging machines of Hugo Beck are modern multitaskers: they weld a variety of products in film in a multitude of ways. side sealing, fin seal, cut welding seam, overlapping, form sealing, display packaging, re-sealable sealing etc. – various packaging types can be flexibly combined with one another. Innovative fusions thanks to our modular design, cunningly linked downstream and upstream production units, and our intelligent drive and control technology. Hugo Beck machines are controlled by state-of-the-art servo drives – thereby making it possible to process various lengths without wear parts. Operation is remarkably convenient and simple thanks to the innovative co-pilot function and a large touchscreen.

**Technical data depending on machine and features**

- **servo X** for bagging or shrink-wrapping: Length from 50mm; Width 20 – 450mm; Height up to 250mm; Output up to 15,000 cycles / hour
- **flexo H** and **servo X** for long and wooden parts: Length from 200mm; Width 20 – 450mm; Height up to 250mm; Output up to 70 metres / minute
- **Pusher machine flexo E** for instable and difficult to handle products such as glass bottles in a bundle: Length 20 – 1,500mm; Width 20 – 600mm; Height up to 300mm; Output up to 1,500 cycles / hour
- **Banderoling machine BP 800** for bundle packaging: Length from 80mm; Width max. 700mm; Height max. 400mm; Output up to 2,100 cycles / hour
- Further machines upon request

**servo X:** Laminate packaging with solid forming shoulder

**servo 800**

For bagging or shrink-wrapping;  
Length: from 100mm; Width 100 – 800mm;  
Height up to 450mm; Output up to 5,000 cycles / hour

## Small price, big possibilities

In the packaging industry, Hugo Beck is synonymous with tailor-made quality and an outstanding strength of innovation. And it is available at low cost. Modern, fast, tailor-made: our form fill and seal machine flexo X is a typical Hugo Beck product – and is available at an attractive entry-level price. With an output range of up to 6,000 cycles / hour, flexo X not only offers solid and flexible basic features, it also includes all the features of the larger models such as co-pilot, PLC or a user-friendly path control.
